

Low Retention Microtubes

Produced from medical grade polypropylene

Ultra smooth surface

Extended lip for easy opening

Highly transparent

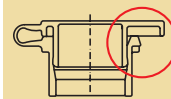

TreffLab Microcentrifuge Tube offer ultra smooth surfaces minimizing retention of samples. The tubes feature extended lips for easy opening, marked graduations and frosted labelling panels on tube and cap for easy writing and identification. TreffLab microtubes withstand centrifugal forces of up to 38,000g and can endure extreme temperatures from -190°C up to +121°C. TreffLab microtubes are manufactured according to the quality assurance system ISO 9001:2000/ ISO 13485:2003 and from highest quality polypropylene. They are available in natural, four cadmium-free colours, black, for light sensitive work, plus a highly transparent natural.

Withstands up to 38,000 g

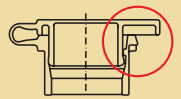

Extended lip for easy opening

EasiFit

ClickFit

For air-tight sealing two cap options are offered The original EasiFit for general purpose usage and storage and the ClickFit designed to reduce popping for heating applications.

1.5 ml EasiFit Microtubes

The original EasiFit cap for general purpose usage and storage. 4 cadmium free colours are available.

0.5 ml EasiFit Microtubes

The 0.5 ml tube fits perfectly into thermal cyclers assuring maximum heat transfer to the sample.

1.5 ml EasiFit Cap Microtubes
